

INSTRUCTIONS:

Goal of the Project:

In class 1 to 52, We have learnt two kinds of languages - imperative and declarative - and much more!

We will test your skills today. Lets Go!!

Story:

A good coder should always be ready to answer any questions related to programming. As you are a gaming coder now, let's see how much you remember!

Getting Started:

1. Download the Project Questionnaire document from this [link](#).

Specific Tasks to complete the Project:

1. Recollect your coding notes and summary.
2. Add answers to each of the questions in the Questionnaire.
3. Use the references given in the Hints to find out answers to questions you may not know.

Submitting the Project:

1. Upload this questionnaire on Google Docs.
2. Share the document with your teacher and give her the edit access.
3. Copy the URL of this Google Doc and paste it in the Student Dashboard against the correct class number.

Hints:

1. Your summary notes should be your first reference!
2. CSS Properties:
 - [Reference 1](#)
 - [Advanced Tutorial](#)
3. [Introduction to React Native](#)

REMEMBER... Try your best, that's more important than being correct.

After submitting your project your teacher will send you feedback on your work.
